

OPEN SOURCE SOFTWARE DECLARATION

The software pre-installed in the JVC Digital Televisions consists of multiple, independent software components. Each software component is copyrighted by JVC or a third party. The JVC Digital Televisions uses software components that are distributed as freeware under a third-party end-user license agreement or copyright notice (hereinafter referred to as a "EULA"). Some EULAs require that the source code of the applicable component be disclosed as the condition for distributing the software component in executable format. The JVC warranty provided in respect of the Digital TV is the only warranty provided and no additional warranties are provided in respect of the software components subject to EULAs. Some of the software components distributed under EULAs are made available for use by the user on the premise that they are not copyrighted or warranted by JVC or any third party. These software components are licensed to the user free of charge and therefore not covered by any warranty within the scope of the applicable laws. These software components are provided in "as is" condition without any warranty, whether express or implied. "Warranty" here includes, but not limited to, an implied warranty for marketability or fitness for specific uses. All risks associated with the quality or performance of these software components are assumed by the user. JVC shall not be liable whatsoever for any cost of repair or correction or other incidental expense incurred in connection with a defect found in any of these software components. Unless specified under the applicable laws or in a written agreement, a party who changes or redistributes the software with consent from the copyright holders or based on the aforementioned licenses shall not be held liable whatsoever for any loss arising from the use of or inability to use such software components. The same applies even when the copyright holders or relevant third parties have been informed of the possibility of such loss. "Loss" here includes normal, special, incidental and indirect loss (including, but not limited to, the loss of data or its accuracy; loss incurred by the user or any third party; and interface incompatibility with other software). Please read each EULA for details on the use conditions and items that must be observed regarding these software components. For details of software components covered by "GPL".

NAME	VERSION	URL	LICENCE	MODIFICATION	USAGE	INTRODUCTION	OWNER	FEATURE
FreeType	2.3.10	www.freetype.org file : FTL	FreeType License	Yes	Static Link	The FreeType Project is copyright (C) 1996-2002, 2006 by David Turner, Robert Wilhelm, and Werner Lemberg. FreeType 2 is a software-font engine that is designed to be small, efficient, highly customizable and portable, while capable of producing high-quality output (glyph images).	Vestel	Standard
Libjpeg	6b	http://libjpeg.sourceforge.net/ File : libjpeg.txt	Custom, free software license	No	Static Link	libjpeg is a widely-used free software library written in C which implements JPEG decoding and encoding functions alongside various utilities for handling JPEG images. This library is maintained by the Independent JPEG Group (IJG), an informal organization which is not affiliated with the JPEG ISO committee.	Vestel	Media Browser
Mplib	1.0.3	http://mplib.sourceforge.net/ File : mplib.txt	BSD License	Yes	Static Link	C Library that lets programs access ID3 tags id3v1 and v2 in mp3 files. These tags are meta-informations such as the title, artist or comments that come with most MP3s. It is easy to use and fast.	Vestel	Media Browser
Cximage	5.99c	http://sourceforge.net/projects/cximage/ file : cximage.txt	Zlib License	Yes / Klocwork	Static Link	Cximage is a C++ class that can load, save, display, and transform images in a very simple and fast way. The class Cximage is free; as for the TIFF, JPEG, PNG and ZLIB libraries : "If you use this source code in a product, acknowledgement is not required but would be appreciated."	Vestel	Media Browser
Libpng	1.2.39	http://www.libpng.org/ file : libpng.txt	Zlib License	Yes / Klocwork	Static Link	libpng is the official PNG reference library. It supports almost all PNG features. It is extensible, and has been extensively tested for over 17 years. The home site for development versions (i.e., may be buggy or subject to change or include experimental features) is http://libpng.sourceforge.net/ , and the place to go for questions about the library is the png-mng-implement mailing list.	Vestel	Standard (SVG)
Asn1decoder	-	wiki.mozilla.org file : MPL-1.1.txt	Mozilla Public License Version 1.0	Yes / Klocwork	Compile Tool	ASN1C is a source code generation tool. It translates ASN.1 or XML schema definition (XSD) files into equivalent source code in a computer language such as C, C++, C#, or Java.	Vestel	Standard (MHEG)
SHA2		http://en.wikipedia.org/wiki/SHA-2 file : sha2.txt	These variants are patented in US patent 6829355. The United States has released the patent under a royalty free license, BSD	Yes	Static Link	SHA-2 is a set of cryptographic hash functions (SHA-224, SHA-256, SHA-384, SHA-512) designed by the National Security Agency (NSA) and published in 2001 by the NIST as a U.S. Federal Information Processing Standard.	Vestel	Standard (SEA-OAD)
zlib	1.2.3	http://www.zlib.net/ file : zlib_license.html	Zlib License	Yes	Static link	Zlib compression library, developed by Jean-loup Gailly and Mark Adler. (Copyright © 1995-1998 by Jean-loup Gailly and Mark Adler)	Vestel	Standard
TinyXML	2.6.2	http://www.sourceforge.net/projects/tinyxml file : zlib_license.html	Zlib License	Yes / Klocwork	Static link	TinyXML is a simple, small, C++ XML parser that can be easily integrating into other programs.	Vestel	Standard (SVG)
