

**OPEN SOURCE SOFTWARE DECLARATION**

The software pre-installed in the JVC Digital Televisions consists of multiple, independent software components. Each software component is copyrighted by JVC or a third party. The JVC Digital Televisions uses software components that are distributed as freeware under a third-party end-user license agreement or copyright notice (hereinafter referred to as a "EULA"). Some EULAs require that the source code of the applicable component be disclosed as the condition for distributing the software component in executable format. The JVC warranty provided in respect of the Digital TV is the only warranty provided and no additional warranties are provided in respect of the software components subject to EULAs. Some of the software components distributed under EULAs are made available for use by the user on the premise that they are not copyrighted or warranted by JVC or any third party. These software components are licensed to the user free of charge and therefore not covered by any warranty within the scope of the applicable laws. These software components are provided in "as is" condition without any warranty, whether express or implied. "Warranty" here includes, but not limited to, an implied warranty for marketability or fitness for specific uses. All risks associated with the quality or performance of these software components are assumed by the user. JVC shall not be liable whatsoever for any cost of repair or correction or other incidental expense incurred in connection with a defect found in any of these software components. Unless specified under the applicable laws or in a written agreement, a party who changes or redistributes the software with consent from the copyright holders or based on the aforementioned licenses shall not be held liable whatsoever for any loss arising from the use of or inability to use such software components. The same applies even when the copyright holders or relevant third parties have been informed of the possibility of such loss. "Loss" here includes normal, special, incidental and indirect loss (including, but not limited to, the loss of data or its accuracy; loss incurred by the user or any third party; and interface incompatibility with other software). Please read each EULA for details on the use conditions and items that must be observed regarding these software components. For details of software components covered by "GPL".

OSS name	OSS version	OSS project URL	OSS license	OSI approval	Modifications	Usage	introduction
Linux kernel	2.6.35	<a href="http://www.kernel.org">http://www.kernel.org</a>	GPLv2	Yes	Yes	Kernel	linux os kernel
uClibc	0.9.32	<a href="http://uclibc.org/">http://uclibc.org/</a>	LGPLv2.1	Yes	No	Dynamic Link	c runtime library
FreeType International Components for Unicode	2.3.7	<a href="http://freetype.sourceforge.net">http://freetype.sourceforge.net</a>	FreeType.txt	Yes	Yes	Dynamic Link	FreeType 2 is a software font engine that is designed to be small, efficient, highly customizable, and portable while capable of producing high-quality output (glyph images).
	3.2	<a href="http://www.icu-project.org/">http://www.icu-project.org/</a>	ICULicense.txt	Yes(MIT License)		Static linked	This library is used to perform UNICODE string manipulation.
zlib	1.2.3	<a href="http://www.zlib.net/">http://www.zlib.net/</a>	zlib.txt	Yes	No	Dynamic Link	The 'zlib' compression library provides in-memory compression and decompression functions, including integrity checks of the uncompressed data.
libpng	1.2.43	<a href="http://www.libpng.org/pub/png/libpng.html">http://www.libpng.org/pub/png/libpng.html</a>	libpng.txt	Yes		Dynamic Link	PNG decoder
JPEG	8c	<a href="http://www.jpeg.org/">http://www.jpeg.org/</a>	libjpeg-7.txt	No Custom free software	Yes	Dynamic Link	This library is used to perform JPEG decoding tasks.
ALSA	1.0.24.1	<a href="http://www.alsa-project.org">http://www.alsa-project.org</a>	LGPLv2.1	Yes		Dynamic Link	Advanced Linux Sound Architecture (ALSA)
openssl	1.0.0	<a href="http://www.openssl.org/">http://www.openssl.org/</a>	OpenSSL	No(Apache License 1.0 and 4-clause BSD License)		Dynamic Link	OpenSSL is an open source implementation of the SSL and TLS protocols. The core library (written in the C programming language) implements the basic cryptographic functions and provides various utility functions. Wrappers allowing the use of the OpenSSL library in a variety of computer languages are available
e2fsprogs	1.41.14	<a href="http://e2fsprogs.sourceforge.net/">http://e2fsprogs.sourceforge.net/</a>	GPLv2	Yes		Program & Dynamic Link	e2fsprogs provides the filesystem utilities for use with the ext2 filesystem, it also supports the ext3 and ext4 filesystems
Busybox	1.15.3	<a href="http://www.busybox.net/">http://www.busybox.net/</a>	GPLv2	Yes	Yes	Program	BusyBox combines tiny versions of many common UNIX utilities into a single small executable.
sysvinit	2.86	<a href="http://savannah.nongnu.org/projects/sysvinit">http://savannah.nongnu.org/projects/sysvinit</a>	GPLv2	Yes	No	Program	a program contains control system start/run/end command
SquashFS	3.0 - 4.2	<a href="http://squashfs.sourceforge.net/">http://squashfs.sourceforge.net/</a>	GPLv2	Yes		Tool	used for make squashfs image
kexec	2.0.3	<a href="http://kernel.org/pub/linux/utils/kernel/kexec/">http://kernel.org/pub/linux/utils/kernel/kexec/</a>	GPLv2	Yes	Yes	Program	kexec can reboot to linux kernel
zlib	1.2.5	<a href="http://zlib.net">zlib.net</a>	zlib.txt	Yes		Dynamic Link	
Doug Lea's malloc		<a href="http://gee.cs.oswego.edu/dl/html/malloc.html">http://gee.cs.oswego.edu/dl/html/malloc.html</a>	dmalloc.txt	No	Yes	Static Link	provides implementations of the the standard C routines malloc()
libtomcrypt	1.16	<a href="http://home.libtom.org/">http://home.libtom.org/</a>	libtom.txt (public domain)	No(WTFPL)	Yes	Static Link	supports a variety of cryptographic and algebraic primitives
Lzma	4.65	<a href="http://www.7-zip.org/sdk.html">http://www.7-zip.org/sdk.html</a>	Public domain	No	yes	Static Link	Used in the compressed image to improve compression rate

Program means it is a stand-alone main program.  
 Tool is only used on build server. Not on target system.
